Company profile

Mirion Technologies (AWST) GmbH in Munich offers services in the field of radiation protection and dosimetry. As an official measuring station, it carries out dose measurements to ensure compliance with occupational health and safety limits for occupationally exposed persons and, with almost two million evaluations of dosimeters per year, is the largest measuring station in Germany and Europe.

Mirion Technologies (AWST) GmbH is accredited according to ISO 17025 and maintains a secondary standard X-ray calibration laboratory to ensure traceability of all dosimetric readings to national standards. As a result of new developments in medicine and medical technology, as well as new legal framework conditions, Mirion Technologies (AWST) GmbH is developing new personal dosimeters, which are to be used increasingly as partial body dosimeters in interventional radiology, for example. In these development projects, both X-ray calibration equipment and Monte Carlo simulation methods are used.

Highest quality is the set goal for each of our MIRION products.

Mirion Technologies (AWST) GmbH, with approximately 70 employees at the Munich site, is the service provider responsible for sales, project management and maintenance of our radiation measurement products in Germany. In addition, our Dosimetrics brand manufactures the BeOSL system, which includes the core components, the BeOSL reader and the BeOSL dosimeter. Our team works closely with our suppliers, partners and the other subsidiaries around the world.

For our Munich or Arnheim site we are looking for:
